Type 685 Heel Resistant Brickslot 200 Access Unit - 19.69" (0.5 m)	138077	4.45	113	29.0

Specifications

General
The surface drainage system shall be ACO Drain Brickslot, as manufactured by ACO Polymer Products, Inc. or equal approved.

Materials
The Brickslot top is manufactured from 11 gauge stainless steel.

The nominal clear opening for Brickslot is 7/8" (22.35 mm) with two – 5/16" (8 mm) slot openings and with a 1/4" (6.35mm) bar between the two openings. Overall width is 9.37" (238 mm). For use with K200, KS200, SlabDrain (H200K-13, H200KS-13), and the K200 Series 900 catch basin. See separate ACO Spec info sheet for channel details. Brickslot rests in the grate seating of the channel, the anti-shunt lugs help prevent lateral movement and the weight of covering material keeps the unit secured. Access units have frames that fit catch basins with a separate unit that can be removed for maintenance.

Installation
The trench drain system shall be installed in accordance with the manufacturer's installation instructions and recommendations.
